Misconduct in Research and Scholarship (University Policy Number 4007)

<http://universitypolicy.gmu.edu/policies/misconduct-in-research-and-scholarship/>

George Mason University supports the principle that all individuals involved in research, regardless of funding source, must become familiar with the professional and ethical standards expected in an academic research setting. All proposed personnel should be familiar with University Policy Number 4007. Additional information on the Responsible Conduct of Research can be found on the Office of Research Integrity & Assurance website (<http://oria.gmu.edu/ethical-conduct-of-research/>).

National Institutes of Health (NIH) Public Access Policy

(see: <http://publicaccess.nih.gov/> for the policy)

This new policy ensures that the public has access to the published results of NIH-funded research. It requires scientists and researchers to submit final peer-reviewed journal manuscripts that arise from NIH funds to the digital archive PubMed Central (<http://pubmedcentral.nih.gov>). The policy requires that these final peer-reviewed manuscripts be accessible to the public on PubMed Central to help advance science and improve human health.

This policy applies to any manuscript that is peer-reviewed; is accepted for publication in a journal on or after April 7, 2008; and arises from any direct funding from an NIH grant or cooperative agreement active in Fiscal Year 2008; or any direct funding from an NIH contract signed on or after April 7, 2008; or any direct funding from the NIH Intramural Program. (See: <http://publicaccess.nih.gov/FAQ.htm> for frequently asked questions)

REVIEWED AND APPROVED FOR GEORGE MASON UNIVERSITY

Signatures below constitute concurrence with and/or approval of all matters addressed in this proposal review. Signatures certify agreement with all elements of Indirect Recovery Distribution (see page 1) and all GMU resource commitments as described above and in budget. **PI signature certifies that 1) the information submitted on the routing form and within the application is true, complete and accurate to the best of the PI's knowledge; 2) that any false, fictitious, or fraudulent statements or claims may subject the PI to criminal, civil, or administrative penalties; and 3) that the PI agrees to accept responsibility for the scientific conduct of the project and to provide the required progress reports if a grant is awarded as a result of the application.**
